## **PRESS RELEASE**

FOR IMMEDIATE RELEASE  
ATTN: NEWS EDITOR

DATE: 19<sup>TH</sup> MARCH 2025

### **GHANA WATER LTD. RESTORES WATER SUPPLY TO THE GREATER KUMASI AREA**

Management of Ghana Water Limited (GWL), Ashanti Region, wishes to announce the successful restoration of water supply from Barekese WTP, today, Wednesday, 19<sup>th</sup> March 2025, after the recent shutdown aimed at addressing operational challenges at the Suame Roundabout. This maintenance was necessary to ensure the reliability of the water supply, despite construction projects in the region.

Management extends our heartfelt appreciation to the Regional Minister for the Ashanti Region, Dr. Frank Amoakohene, for his unwavering support and guidance throughout this process. His involvement has been crucial in facilitating a smooth resolution to the challenges.

Notwithstanding the restoration of the water supply, we would like to inform our cherished customers that it may take a few hours for water pressures to stabilize across the network. While some customers may experience a service return shortly, others may encounter delays as pressure levels build to optimal distribution levels. Management appreciates the patience and understanding of customers during the period of the shutdown.

Management is committed to providing reliable water services to our communities and values the support of customers as we work diligently to ensure that every customer receives water supply.

Management appreciates your continued loyalty and trust in Ghana Water Limited.
