PRESS STATEMENT FOR IMMEDIATE RELEASE

ZOOMLION GHANA LIMITED REASSURES MMDA FUMIGATION WORKERS OF PAYMENT OF OUTSTANDING ARREARS

Accra, August 3, 2026 – Management of Zoomlion Ghana Limited observes with grave disquiet, concerns expressed by workers engaged under the Metropolitan, Municipal and District Assemblies (MMDAs) Fumigation Project regarding the delay in the payment of their outstanding salaries.

Management wishes to assure all affected workers that the company fully appreciates the challenges associated with the delay and remains committed to ensuring that every legitimate outstanding payment is made as soon as the necessary funds are received.

Over the past 15 years, Zoomlion Ghana Limited has maintained a good record of meeting its obligations to employees and field operatives of the MMDAs Fumigation Project across the country. The current situation is therefore an exception rather than the norm and has arisen as a result of delays in the release of funds under the MMDA Fumigation Project.

Following the delay, the company has remained in continuous dialogue with the Government of Ghana and the various Metropolitan, Municipal and District Assemblies, working to secure the release of the outstanding payments due under the contract. These engagements have been constructive, and we have received assurances that the necessary processes are being finalized to enable disbursement of the funds.

Management wishes to state clearly, and without reservation, that all arrears owed to our workers under the project will be settled promptly once these outstanding payments are received.

We are deeply grateful for the patience, understanding and unwavering dedication our workers have shown throughout this period. We recognise the hardship any delay in payment can cause, and we do not take their continued commitment for granted. Their tireless efforts have been instrumental in safeguarding public health through sustained vector control and environmental sanitation interventions in communities across the country.

Zoomlion also recognizes and respects the constitutional right of workers to express their concerns peacefully. We take encouragement from the fact that the issues raised reflect a shared desire to see this matter resolved promptly. The company therefore appeals to all affected workers to remain calm and to continue placing their confidence in the ongoing engagements aimed at bringing this matter to a successful conclusion.

The company deeply values the strong partnership it has built over the years with the Government of Ghana, the Metropolitan, Municipal and District Assemblies, and its dedicated workforce. It is through this collaborative relationship that significant public health gains have been achieved, and Management remains confident that the current challenge will soon be resolved through continued dialogue and cooperation.

Zoomlion Ghana Limited remains steadfast in its commitment to the welfare of its employees and to delivering quality environmental sanitation services in support of national development.
